

JORENKU Lick Stone

JORENKU Lick Stone

Lick stones are essential in securing the individual need of salt, minerals, trace elements and vitamins, which are essential for good health, and therefore the performance of the livestock.

A possible lack of these elements can result in reduced appetite, milk yield, growth, and natural resistance. Also, fertility problems and weight loss can increase.

Because of the natural licking behaviour of animals, they can balance their need for salt, minerals, trace elements and vitamins by means of a lick stone.

The lick stones are produced with a high-pressure method, that makes them resistant to rain and easy to handle. The lick stones consist only of the finest and purest salt or salt with the addition of approved feed additives such as minerals and vitamins modified to different animal species.

Each animal has its individual (salt) need, which is why Jorenku has special lick stones for cattle, sheep, horses, and game.

All 5 types of lick stones are GMP+ certificated and approved for use in organic production in accordance with Council Regulation (EC) No 834/2007 and Commission Regulation (EC) No 889/2008.

All 5 types of lick stones are available as 10 kg stones.
SP™ Natural and SP™ Universal are also available as 2 kg stones.

SPTM Natural

SPTM Natural Natural salt

- Lick stone of natural salt without additives
- Can be used for all livestock
- Can be used in organic livestock production

SPTM Natural is the ideal supplement to the animals' daily feed and an extra guarantee for an adequate salt supply. Thus this lick stone is an easy way to ensure that the animals get their essential need of salt covered. The lick stone is suitable for all kind of animals.

Composition	
Sodium	39 %

Product	SP TM Natural
Product type	Lick stone
Packaging	10 kg stone 2 kg stone
Feed type	Free access lick

SPTM Universal

SPTM Universal With minerals

- Lick stone of natural salt with added minerals
- Contains various important trace elements
- Can be used in organic livestock production

The use of roughage can decrease the intake of salt, selenium, and iodine. To meet the general need of important trace elements such as zinc, manganese, copper, iron, iodine, and selenium, the content of SPTM Universal is carefully tailored and designed to effectively meet the animals' needs of minerals and trace elements.

The stone is suitable for cattle, horses, goats, and wildlife.

Composition	
Sodium	38.5 %
Calcium	2.5 g/kg
Magnesium	1.0 g/kg
Cobalt	12 mg/kg
Copper	80 mg/kg
Iodine	50 mg/kg
Manganese	200 mg/kg
Selenium	20 mg/kg
Zinc	300 mg/kg

Product	SP TM Universal
Product type	Lick stone
Packaging	10 kg stone 2 kg stone
Feed type	Free access lick

JORENKU Horse Block

Jorenku Horse Block

With biotin and selenium

- Lick stone with biotin and selenium
- Block of natural salt with trace elements and vitamins

Selenium and vitamin E are needed to maintain a good muscle function and a strong immune system. Therefore, Jorenku Horse Block is made of natural salt enriched with trace elements and vitamins, which i.a. prevent split hooves.

Composition	
Sodium	98 %
Calcium	1,000 mg/kg
Magnesium	1,000 mg/kg
Zinc	600 mg/kg
Copper	400 mg/kg
Iron	220 mg/kg
Manganese	200 mg/kg
Iodine	50 mg/kg
Cobalt	12 mg/kg
Selenium	2.6 mg/kg
Selenium methionine	2.6 mg/kg
Vitamin E	150 mg/kg
Biotin	20 mg/kg

Product	Jorenku Horse Block
Product type	Lick stone
Packaging	10 kg stone
Feed type	Free access lick

SPTM Sheep

SPTM Sheep

For sheep - without cobber

- Lick stone of natural salt with added minerals
- Contains various important trace elements
- Can be used in organic livestock production

The salt need of sheep depends on many highly varying factors - i.a. weight, feed, composition of the grass and water absorption. Therefore, a lack of sodium may cause i.a. reduced appetite, weight loss and sickness. SPTM Sheep is therefore an effective way to meet the individual needs of the sheep. SPTM Sheep does not contain copper.

Composition	
Sodium	38.5 %
Calcium	2.0 g/kg
Magnesium	2.0 g/kg
Cobalt	20 mg/kg
Iodine	50 mg/kg
Manganese	170 mg/kg
Selenium	30 mg/kg
Zinc	120 mg/kg

Product	SP TM Sheep
Product type	Lick stone
Packaging	10 kg stone
Feed type	Free access lick

SPTM Wildlife

SPTM Wildlife

For game - with cobber

- Natural salt with added minerals and vitamins
- Contains various important trace elements
- Can be used in organic livestock production

Salt, minerals, vitamins, and trace elements are essential to the health of game, and because salt is rarely found in their natural environment, the content of SPTM Wildlife is especially modified to meet the needs of game. Vitamin A is vital for growth, resilience, and night vision, while copper, selenium, and vitamin E are important components for the wildlife's immune system. With advantage, the stone can be used during spring and autumn.

Composition	
Sodium	38.5 %
Calcium	0.1 g/kg
Magnesium	1.0 g/kg
Cobalt	60 mg/kg
Copper	2,000 mg/kg
Iodine	50 mg/kg
Manganese	200 mg/kg
Selenium	30 mg/kg
Zinc	600 mg/kg
Vitamin A	250,000 iu/kg
Vitamin E	75 mg/kg

Product	SP TM Wildlife
Product type	Lick stone
Packaging	10 kg stone
Feed type	Free access lick
