# JORENKU Porcichew

**Porcichew is a toy, which can be used as enrichment for pigs.**

Porcichew attracts the pigs with attractive scents, so the pigs want to bite and play with the toy. The more the pigs bite and play with the toy, the more scent it releases. Therefore, with advantage the Porcichew can be used in pig herds where challenges with tail bites are seen.

Porcichew distinguishes itself from other toys as it is made of biodegradable material with an antibacterial function, killing 99.9 % of E-coli and MRSA bacteria.

Furthermore, Porcichew is hygienic and has a unique design securing high animal welfare. At the same time, the design allows several pigs to play together.

Suitable for all pigs from 6 weeks and onwards.

Porcichew has a 15 cm diameter and comes in 9 colours each with its own scent as well as with and without a 60 cm long galvanized chain.

The chain is specially designed with a ring six links from the bottom. This adds interaction and sound for the pigs.

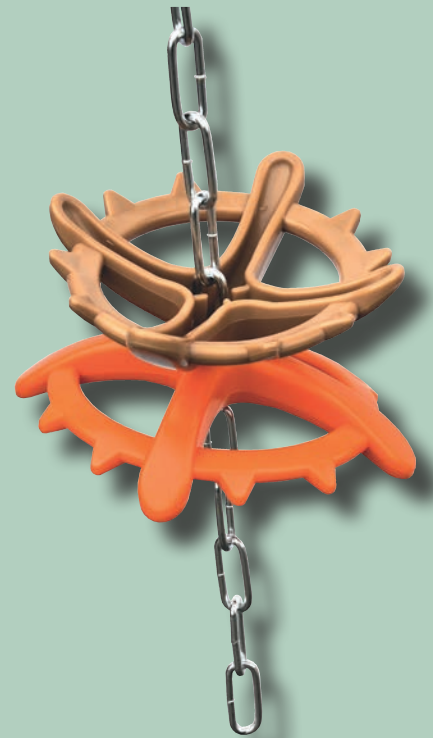

With advantage, more Porcichews can be joined together on the same chain to give several variations of scent and color.
