

JORENKU Propylene glycol with taste

JOENKU Propylene glycol with taste

Propylene glycol with taste is a liquid supplementary feed for cattle.

Propylene glycol with taste is used as energy supplement for dairy cows for the first 3-6 weeks after calving.

The advantage by using the product is reducing the risk of ketosis among dairy cows. With advantages it can also be used in cases of acute ketosis.

Propylene glycol tastes of plum and custard, which increases the appetite.

Propylene glycol with taste can be used either as a top dressing or inject orally with a drench gun. The product can also be used in automatic dosing systems.

Propylene glycol with taste is available in cans with 5 kg and 20 kg as well as in drums with 200 kg and IBC containers with 1,000 kg.
