

# JORENKU Ferro-Min

**JORENKU Ferro-Min**  
Supplementary feed with iron for piglets

**Composition:**

- Sodium chloride
- Iron oxide

**Additives:**

- Sodium benzoate 18301
- Potassium sorbate E202
- Potassium carbonate 29625 32,500 mg/kg
- Citric acid E330
- Iron sulphate 38104
- Hydrochloric acid E510
- Zinc oxide 28169
- Propionic acid E280

**Batch number:** 80662/8062021 • **Production date:** 08-06-2021 • **Weight:** 225 kg

**UN 1760, 8, III**

# JORENKU Ferro-Min

## **Ferro-Min is a supplementary feed containing iron for piglets.**

The piglets' need for iron is not covered by the sow's milk and therefore, it is important to provide them with iron, as iron deficiency can lead to anemia, lower growth, and increased mortality. Iron is also central to the haemoglobin in red blood cells.

Ferro-Min iron supplement (drinking-iron) is based on Fe-glutamate, which is a special high-absorbency iron source that provides a high haemoglobin level and ensures piglets easy absorption of iron supplement.

As the only product on the market, Ferro-Min is highly concentrated, which gives low processing price.

Ferro-Min tastes good. The sour taste from the citric acid increases the digestion of liquid, which ensures the welfare of the piglets and adds extra energy through the content of sugar in the electrolytic mixture.

The added organic acids in Ferro-Min stabilise the intestine and are beneficial to the overall gastrointestinal health. Low pH in the drinking water via milk- and citric acid together with electrolytes, reduce indigestion resulting in a higher growth and increased weaning weight.

When using Ferro-Min as a supplement, infection through cannula is excluded, which reduces the problems of joint and encephalitis. Free access to iron supplement supports the pigs' own natural regulation of the haemoglobin level.

Ferro-Min is allocated immediately from birth and 3-4 weeks ahead.

Ferro-Min is available in cans with 30 kg and in drums with 120 kg and 225 kg.

# JORENKU Ferro-Min

## Ferro-Min

Liquid supplementary feed for piglets containing iron

- Enhances the uptake of liquid
- Supports the gastrointestinal health
- Results in higher growth
- Results in higher increased weaning weight
- Supports the regulation of haemoglobin levels

Additives
Sodium benzoate
Potassium sorbate
Fe-glutamate
Citric acid
Iron sulphate
Hydrochloric acid
Zinc oxide
Propionic acid

Product	Ferro- Min
Product type	Supplementary feed
Packaging	30 kg can 120 kg drum 225 kg drum
Intake per animal per day	25-30 ml per pig

**JORENKU Ferro-Min**  
Supplementary feed with iron for piglets

**Composition:**

- Sodium chloride
- Iron oxide

**Active ingredients:**

- Sodium benzoate 18.301
- Potassium sorbate 8.212
- Potassium carbonate 296.225 32.500 mg/kg
- Citric acid 8.339
- Iron sulphate 38.108
- Hydrochloric acid 8.547
- Zinc oxide 26.659
- Propionic acid 8.210

**Batch number:** 80662/08062021 • **Production date:** 08-06-2021 • **Weight:** 225 kg
