

# JORENKU Alka-Liq

# JORENKU Alka-Liq

**Alka-Liq is a liquid, strong alkaline detergent with good dirt-dissolving properties for warm cleaning of e.g. milking systems and cooling tanks in the agriculture sector.**

Alka-Liq is based on sodium hydroxide and sodium hypochlorite. Because of the high alkalinity and chlorine content Alka-Liq is effective for daily cleaning just as it can be used as problem solver in very dirty plants and by challenging situations.

With regular use, not only cleanliness is achieved but also a low bacterial count.

Alka-Liq may not be used on aluminium or other non-alkali-resistant surfaces nor mixed with acid or acid-containing products.

Alka-Liq can be used with both manual and automatic dosage.

Alka-Liq is available in cans with 22 kg, drums with 200 kg and IBC containers with 1,000 kg.

If you want an acidic cleaning and disinfecting agent instead, it is recommended to use Oxi-Liq.
