

# JORENKU Benzoic Acid

# JORENKU Benzoic Acid

## Benzoic acid Liquid supplementary feed

- Prevents unwanted fermentation
- Prevents unwanted loss of nutrients
- Reduces the loss of free amino acids
- Reduces harmful microorganisms

Benzoic acid counteracts the loss of nutrients by preventing unwanted fermentation, which can cause poor feed efficiency and growth, reduced milk yield and low dressing percentage. Benzoic acid also has a strong antimicrobial quality.

Benzoic acid does not require HACCP certification.

Benzoic acid is available in cans with 25 kg, drums with 240 kg and IBC containers with 1,050 kg.
