

JORENKU Citric Acid

JORENKU Citric Acid

Citric acid Liquid supplementary feed

- Lowering the pH
- Acidification of milk
- Cleaning of equipment

Used in wet and dry feed as taste improving substance by medication against urinary tract infection as well as lowering the pH in the drinking water, because the citric acid precipitous lowers the pH without being aggressive.

Citric acid can also be used for acidification of milk for young calves.

Furthermore, citric acid can be used for cleaning water pipes for liquid iron as well as for countless other cleaning tasks.

Citric acid does not require HACCP certification.

Citric acid is available in cans with 30 kg, drums with 240 kg and IBC containers with 1,000 kg.
