

JORENKU Eurovit E100 Nature w. selenium

JOENKU Eurovit E100 Nature w. selenium

Natural liquid vitamin E combined with selenium.

Eurovit E100 Nature with selenium is a supplementary feed, that contains 100 % natural active vitamin E.

The effect of selenium combined with vitamin E is very effective because selenium gives increased vitality for the breeding animals.

Among cattle, by adding vitamin E to the milk, it secures strong calves from weaning.

Among horses, Eurovit E100 Natur with selenium can with advantage be used after hard training and in the transition to even harder training, because vitamin E contributes to healthier muscles. In addition, the product can be used when young horses are broken in. Eurovit E100 Nature with selenium is mixed into the compound feed, oats and mash.

Furthermore, Eurovit E100 Nature with selenium secures high vitamin E application as opposed to synthetic vitamin E.

Eurovit E100 Nature with selenium does not require HACCP certification.

Eurovit E100 Nature with selenium leveres is available in cans with 1 kg, 2, kg, 15 kg and 25 kg.
