# JORENKU Eurovit K<sub>3</sub>-2000

**Eurovit K<sub>3</sub>-2000 is assigned when the blood is unable to coagulate.**

Eurovit K<sub>3</sub>-2000 is used as a specific problem solver for pigs where vitamin K deficiency has been found by e.g. internal bleeding (intestinal bleeding), chronic intestinal diseases or protracted antibiotic treatments.

When extra vitamin E is assigned, the need for vitamin K increases. Lack of vitamin K shows in an increased tendency to bleed, as the blood takes longer to coagulate.

Therefore, vitamin K contributes to normalise the blood's ability to coagulate in connection with wounds. Furthermore, it contributes to the formation of bones and strengthens the liver.

Eurovit K<sub>3</sub>-2000 is dosed in compound feed or drinking water.

Eurovit K<sub>3</sub>-2000 is available in cans with 25 kg and drums with 200 kg.

## Eurovit K<sub>3</sub>-2000

Liquid supplementary feed for pigs

- Normalises the blood's ability to coagulate
- Problem solver for pigs with internal bleeding
- Assigned by vitamin K deficiency and chronic intestinal diseases

Additives
Vitamin K <sub>3</sub>
Potassium sorbate

Product	Eurovit K <sub>3</sub> -2000
Product type	Supplementary feed
Packaging	25 kg can 200 kg drum
Intake per animal per day	1 kg Eurovit K <sub>3</sub> -2000 per 1,000 kg complete feed Gilts and sows: 5-10 ml Per 10 fattening pigs: 25-50 ml Per 10 piglets: 5-10 ml

## JORENKU Eurovit K<sub>3</sub>-2000

Compound feed - liquid vitamin supplement for pigs

### Composition

- Sodium selenite
- Sodium bicarbonate

### Additives

- Vitamin K<sub>3</sub> 3x711 2.800 mg per kg
- Potassium sorbate E202

- The vitamins are mixed in deionised water

### Guidance / dosage

- Jorenk K<sub>3</sub> 2000 is used in specific problem solvers for pigs where vitamin K deficiency has been found by e.g. internal bleeding (intestinal bleeding).

### Dosage in compound feed

- 1 kg Jorenk K<sub>3</sub> 2000 per 2.000 kg complete feed. This covers the content of vitamin K<sub>3</sub> by 2 ml per kg complete feed.

### Dosage in drinking water

- 5-10 ml
- For 10 fattening pigs 25-50 ml
- For 10 sows 5-10 ml

### Preparation advice

- Shake before first date of manufacture
- Use a clean, dry and in well-ventilated container and away from heat and light.
