JORENKU Ferro-Liq

Ferro-Liq ist ein flüssiges eisenhaltiges Ergänzungsfutter für Saugferkel.

Studien zeigen, dass der Eisenbedarf der Saugferkel nicht durch die Muttermilch der Sau befriedigt wird. Deswegen ist es notwendig, den Saugferkeln einen Eisenzusatz zu geben. Wenn die Saugferkel an Eisenmangel leiden, kann dies zu Anämie (Blutmangel), geringerem Wachstum und erhöhter Sterblichkeit führen. Außerdem ist Eisen für das Hämoglobin in den roten Blutkörperchen wichtig.

Ferro-Liq wird als eisenhaltiges Ergänzungsfutter für neugeborene Saugferkel verwendet. Ferro-Liq wird von der Geburt bis zur Entwöhnung verabreicht.

Aufgrund der Zitronensäure ist Ferro-Liq wohlschmeckend, was den Saugferkeln gefällt. Ferro-Liq enthält auch B₁₂-Vitamin, Zink und Eisen.

Der Vorteil bei Verwendung von Ferro-Liq ist, dass es direkt ins Trinkwasser dosiert werden kann und damit einfach zuzuteilen ist.

Bei kontinuierlicher Verwendung von Ferro-Liq ins Trinkwasser, müssen die Rohre/Schläuche regelmäßig mit 3 % Dancid® 80/20 gereinigt werden.

Ferro-Liq wird in Kanistern mit 25 kg und Trommeln mit 120 kg und 225 kg geliefert.
