JOENKU Propionic Acid

Propionic Acid Used for preservation

- Preservation in grain collection facilities
- Preservation in complete feed rations

Used as preservation in grain collection facilities and complete feed rations. Propionic acid especially has a positive effect on the harmful microorganisms mildew and mould, and it can be used for lowering the pH.

NB: Propionic acid requires HACCP certification.

Propionic acid is available in cans with 30 kg, drums with 225 kg and IBC containers with 1,000 kg.
